Professional Experience:

Brand(AliExpress clone):
- Developed and implemented a responsive e-commerce website for the buying and selling of electronic goods based on a Figma design.
- Created seven pages and designed two themes using styled components.
- Utilized functional components and hooks to ensure easy maintenance and testing.
- Achieved a user-friendly and visually appealing website that is accessible on all devices.

PS-Game:
- Implemented Figma design by creating three pages and developed a React app using class components to gain a thorough understanding of the React lifecycle.
- Incorporated private routes and authentication to safeguard selected pages from unauthorized access.
- Utilized actual APIs to construct forms and integrated them with the backend.
- Conducted testing of forms using Postman.

Admin control panel :
- Led a team of four developers in creating a website that delivers reports and analytics f technical training at Gaza Sky Geeks.
- Utilized the Mui library to implement 90% of the website, resulting in an enhanced us experience.
